

POWIS Studio Photobook™ System

The Studio Photobook™ System by Powis gives everyone the power to make photobooks! With a price point much lower than other photobook binding systems, the Studio Photobook System lets you make beautiful photobooks quickly and easily. Whether you own a print shop and want to expand the range of your offerings, or you operate a photo store that needs to stay competitive in the rapidly changing photography market, the Studio Photobook System by Powis is a perfect way to enter the photobook market without breaking the bank.

The Studio Photobook System consists of three pieces of equipment—The Fastback 8x binder, Powis Stitcher (includes a stitch flattening tool), and the Fastback Hardcover Guide. The Fastback 8x Binder is a thermal strip binder with a remarkably small footprint. It takes up no more space than an inkjet printer! The Fastback Stitcher is a powerful desktop system for wire stitching the book contents. The final piece in the system is the Fastback Hardcover Guide, which makes assembling hardcover books a breeze.

Highlights

- **Price Point Perfection**—The Studio Photobook System by Powis gives you capabilities and features that were previously only available in the top-end system, including flexible spines, and compatibility with Fastback Photobook Hardcovers, the finest photobook covers on the market.
- **Easy to Use**—With a few minutes of training, anyone can be up and running with this system. There is no learning curve to worry about.
- **No Set-up Waste**—The Fastback systems require no make ready waste, making it possible to offer one-off books to your clients.
- **Remarkably Fast**—Making a book with the Studio Photobook System only takes a few minutes from start to finish.
